## High School District 211 provides free online energy tracking tool to the community

*Palatine, Ill.* Township High School District 211 is pleased to announce the availability of a free online energy tracking tool. The free web site, *GreenQuest*, is a personal energy dashboard that enables community members to track and analyze energy use for their home or place of business. District 211 is providing *GreenQuest* to the community in order to help educate, raise awareness, and promote energy conservation. *GreenQuest* is accessible through a link on the District 211 web site ([www.d211.org](http://www.d211.org)).

Using the *GreenQuest* web site, district residents can track their energy use and cost; compare their building with its peers; evaluate energy saving projects; track their carbon footprint; analyze energy use with AccuWeather weather data; and as an option for commercial building users, obtain an ENERGY STAR building rating. This safe and secure service is completely free for community members – no confidential user information (account numbers, etc.) is entered into *GreenQuest*.

*We use an energy management software program to track utility bills for all District buildings,* commented District 211 Energy Manager **Reece Thome**, *and we have found it to be invaluable. When you want to save energy and reduce your carbon emissions, the first step is to track your usage. With GreenQuest, we re giving every household and business within our district a powerful tool to do the same thing.*
